P50-ECO FIRE EXTINGUISHER

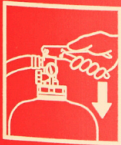

6 LTR : PFAS-FREE FOAM
FIRE TEST RATING 27A - 144B

1 ROTATE PIN TO BREAK SEAL. REMOVE PIN. UNCLIP HOSE.

2 OPERATE NO CLOSER THAN 2 METRES. AIM AT BASE OF FIRE.

3 SQUEEZE HANDLES. RELEASE TO STOP.

WOOD/PAPER

LIQUIDS

ELECTRICAL

SUITABLE FOR USE ON LIVE ELECTRICAL EQUIPMENT UP TO 1000V AT A DISTANCE OF 1m

- UK MANUFACTURED RELEVANT PARTS
- WORKING PRESSURE AT 20°C = 10 BAR
- TEMPERATURE RANGE -45°C TO +55°C DO NOT EXCEED
- PT 22 BAR
- PROTECT FROM
- MODEL No. P50-ECO
- CONTENTS: 6L PFAS-FREE FOAM
- PROPRIETARY COMPRESSION SYSTEM
- FOR USE IN AREAS ONLY DO NOT USE
- HELIUM LEAK TEST
- 10 YEAR QUALITY COVERING WORKING MATERIALS
- RECYCLABLE
- THIS IS A PRODUCT OPENING WILL BE GUARANTEED BY MANUFACTURER AFTER USE

P50 COMPOSITE EXTINGUISHER THE NEXT GENERATION

AVAILABLE VIA YOUR CHOICE FIRE & SECURITY

yourchoicefireandsecurity.co.uk

01977 277 242

THE MOST TECHNOLOGICALLY ADVANCED FIRE EXTINGUISHER EVER

BULLETPROOF DESIGN, MADE IN BRITAIN

Made from industry leading innovative materials pioneered by aerospace and formula one engineering research and development departments.

A lightweight, super strong body made from the same Aramid Fibre found in Kevlar, makes the P50 easy to use when you need it the most.

The highly engineered design makes this piece of equipment extremely durable. The P50 comes with a 10 year corrosion guarantee against rust.

SERVICE-FREE FOR
10 YEARS

The P50 only needs a simple yearly maintenance inspection with a magnet that can be done in minutes.

Swap to P50 Fire Extinguishers

in three easy steps

- 1.** Do a free quote to find out how much you can save.

Book a site visit from one of our sales team, and

- 2.** find out definitively how many you'll need and how quickly we can get you installed.

We can either take away your old extinguishers

- 3.** for a small disposal fee, or you can keep these around for your next fire extinguisher training day.

It's as easy as that. Once you have P50s installed, you know your exact costs for the next 20 years, with no hidden surprises down the road

Got any questions?

A VERSITILE, ONE OF KIND FIRE EXTINGUISHER

The P50 has the unique quality of being able to tackle fires caused by combustible materials, electrical, liquids/gases, & cooking oil.

THE P50 CAN ALSO...

- Streamline training processes.
- Cut the overall number of extinguishers needed for the facility, keeping your space looking clean and tidy.
- Eliminate decision paralysis - with no hesitation whether or not it's the correct type of extinguisher.

RIGOROUSLY TESTED

- ✓ P50 Extinguishers are approved under EN3 with additional testing to the EN composite gas cylinder regulations.
- ✓ 12,000 cycles of testing from (0-25 Bar) after which the unit has to complete a crush test to a minimum of 55 Bar.
- ✓ A drop test of 3 meters with no discharge.
- ✓ Leak test with no less than 1/2 Bar over 11 years.
- ✓ Fire resistant test, suspended over a wooden fire for 2 minutes with no rupture (safe venting is allowed).

How to do a visual inspection...

(the only maintenance needed in ten years)

The extinguisher maintenance programme is a simple process which staff members can easily carry out.

- If an indicator is in the **RED** segment return to manufacturer or appointed director.
- Remove any dust with a clean cloth. Turn upside down to inspect base and locate testing magnet.
- Check date is within 10 year operation lifespan (colour coded for ease). At ten years return to manufacturer to extend the lifespan by another 10 years.
- Check the tamper seal is in place. If not contact Your Choice Fire & Security.
- Check both indicators with a magnet to confirm operation. Moving magnet from side-to-side should move then return to **GREEN** segment.
- Record yearly inspection date in logbook and mark extinguisher with a permanent marker.

Save **thousands** on yearly maintenance and servicing of your fire extinguishers.

The P50 family

The P50F Eco Foam

The eco foam fire extinguisher has excellent firefighting capabilities making it effective on Class A materials fuelled by wood, paper and textiles as well as Class B fires fueled by paints, solvents, oils and petrochemical products.

The extinguisher has also passed the EN3 test for use on live electrical equipment up to 1000V at a distance of 1m. The operational temperature range is from +5 C to +60 C.

This makes the P50 foam extinguisher a true one extinguisher solution for most environments and is able to traditional water, powder and CO₂ extinguishers with a single extinguisher in many scenarios.

P50P6 ABC Powder Extinguisher

The ABC powder is non-conductive and will extinguish Class A (carbonaceous) and Class B (flammable liquids) fires and Class C (flammable gas) fires.

The P50P6 is certified to EN3, CE, BSI Kitemark, MED. The extinguisher has also passed the EN3 test for use on live electrical equipment up to 1000V at a distance of 1m. The operational temperature range is from +5 C to +60 C.

P50FC Ecodare F Class Foam

The formulation of the chemical in this F Class extinguisher is based on nitrogenated derivatives and ammonium salts of phosphoric acid and hydrocarbon and fluorinated surfactants in aqueous solution. The extinguisher medium forms a seal on the surface preventing re-ignition.

It is suitable to be used on Class F (cooking oil) fires. The extinguisher has also passed the EN3 test for use on live electrical equipment up to 1000v at a distance of 1m. The operational temperature range is from +5 C to +60 C

Cost Effective

Fewer callouts and maintenance trips, means less miles on the road and a smaller carbon footprint for your business.

You need fewer units of the P50, and they require less servicing and maintenance. Your investment over the lifespan of the product is much less.

Eco Friendly

WHY CHOOSE THE P50?

The P50 represents the latest breakthroughs in fire extinguisher technology, all rolled into one package.

Know your Costs

They're that easy to use, virtually anyone can pick a P50 up and use it. Speed is crucial in a fire, installing P50s has the added benefit of being usable in seconds for anyone.

Once you install P50s, there's no nasty surprises. You know your costs for 10 years guaranteed. No more getting inflated remedial maintenance invoices every year.
